Currently, the Census 2000 site contains:

- 1990 Census profiles (OFM);
- Count question resolution;
- Link to the U.S. Census Bureau website;
- Summary File 3 (SF3) data tables for Washington;
- 58-page profile, data definitions, SF3 data tables, other data as available;
- 4-page demographic profile for Washington (100% and sample data);
- Summary File 2 (SF2) Race and Ethnicity detail files;
- Geographic crosswalk for Washington relating legislative district, city and school districts.
- Summary File 1 (SF1) data for Washington;
- Demographic profile (DP-1), one-page profile, also included in the 4-page profile;
- Census 2000 redistricting summary file;
- U.S. Census Bureau data tables;
- OFM data tables, maps, and charts;
- Understanding the counts, two research briefs.

Office of Financial Management, Population Data web address:

Washington State Population products include:

- Official April 1 population estimates and forecasts;
- City and county information;
- State Data Center
- Intercensal population and housing unit estimates;
- Special area estimates
- Population density information
- Historical population data
- Annexation reports and forms
- Census manuals and forms.
- Population estimation procedures;
- Household projections (illustrative)
- Race data
- Growth Management county population projections

Publications include:

- *Population Trends for Washington State*
- *Forecast of the State Population*
- *County Projections*
- *2003 Washington State Data Book*
- *State Forecasts to 2030*

PART I

State, County, City Populations

POPLATION TRENDS provides demographic data for the state, counties, cities, and towns as of April 1, 2004. Population determinations contained in this document were developed by the Office of Financial Management (OFM) and represent the official state population figures. Annual population figures for Washington's cities, towns, and counties have been developed and released for over three decades. These estimates are cited in numerous statutes using population as criteria for fund allocations, program eligibility, or program operations, and as criteria for determining county participation in the Growth Management Act.

The 2004 population estimates for cities and towns presented in Table 4 will be used in the allocation of selected state revenues beginning January 2005 (RCW 43.62.020). Population estimates for counties are used to allocate revenues as specified in RCW 36.13.100. Revenue allocations to counties using the 2004 figures will begin with liquor profits in September 2004 (RCW 66.08.200).

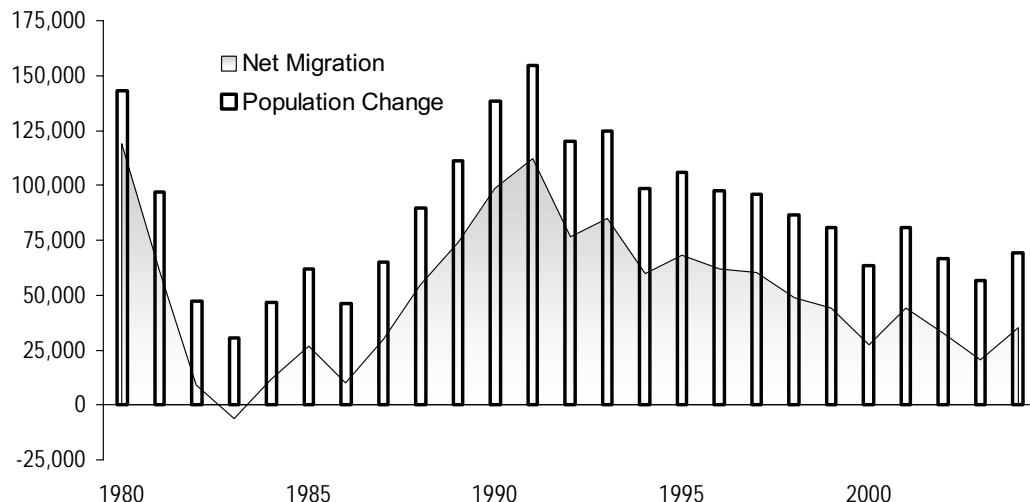

Summary of Population Trends

Washington State population growth begins to increase. Washington State's growth--reflecting the improving economy—is beginning to show signs of change. Annual estimates prepared by the Office of Financial Management show the state's population increased to 6,167,800 in 2004—a gain of 69,500 over last year—or 1.1 percent. This compares to a lesser gain of 56,600, or 0.9 percent, for 2003.

This may just be the beginning of a solid rebound—fostered by improved payroll employment figures in Washington since June 2003, and even faster improvements since January 2004. Population gains usually follow employment increases by six to twelve months.

The state appears to be in a good position to continue gaining in population. The state forecast shows annual population growth slowly increasing from the current level of 69,500 to about 86,000 by 2010, or at an annual growth rate of 1.3 percent. Migration is driven by economic opportunity and is a major component of Washington's growth. Thus, population growth will really depend upon how fast Washington's economy recovers and how that recovery compares to what other states have to offer in terms of job opportunities.

Figure 1. State growth shows modest gain

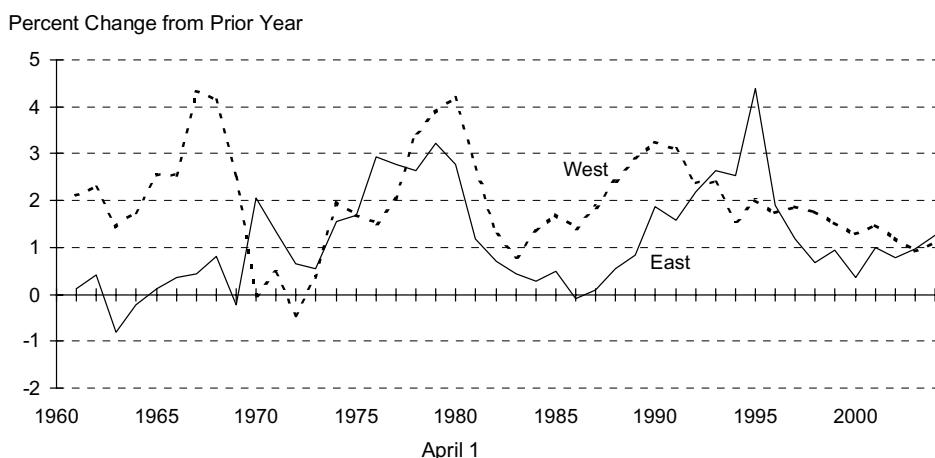

STATE, COUNTY, CITY POPULATIONS

The Census 2000 population count marks the baseline for tracking a new decade of population change in the state. The majority of growth since 2000 remains concentrated in Western Washington with the largest four-year gains being increases of 51,254 in King County, 43,182 in Pierce County, 38,776 in Snohomish County and 38,062 in Clark County.

The fastest growing counties – in terms of percentage change – are Franklin County (15.5 percent), Clark County (11.0 percent), Benton County (8.9 percent) and Kittitas County (7.3 percent). Franklin County was recently ranked by the U.S. Bureau of the Census as being among the top 100 counties with the fastest annual growth rate for 2003.

East-West growth trends continue. Until 2003, annual growth in Eastern Washington had not outpaced that in the West since 1996. Last year, Eastern Washington's population grew 0.96 percent compared with 0.93 percent for the West. In 2004, Eastern Washington continued to outpace the West with 1.25 percent growth compared to 1.12 percent.

Figure 2. Percent Population Growth by Region

Office of Financial Management

July 2004

Growth in Western Washington slowly declined, from over 3.0 percent in the early 1990s, to 2.0 percent in 1995, and to 0.93 percent in 2003. 2003 annual growth was at its lowest since 1983. In 2004, growth has increased to 1.12 percent. Based on Census 2000, 22.2 percent of the state's residents live east of the Cascades. This proportion has been relatively stable over the last ten years. In 2004, the Eastern Washington share is 22.0 percent.

Washington's population in cities and towns reached 3,772,574 by April 1, 2004, up 253,024 over the 2000 federal census count. Annexations and incorporations account for about 113,400 of this increase. There have been no new incorporations over the last year. Spokane Valley in Spokane County, incorporating in March 2003, remains Washington's newest city.

Detailed information on the April 1, 2004 population estimates for cities, towns and counties is contained in this publication and on the Office of Financial Management web page at www.ofm.wa.gov.

Population Estimates Development

*Population estimates presented in this publication represent the **resident population** of an area as defined by the federal Census Bureau. The figures represent all the persons who usually reside in the area designated. This includes military personnel, military dependents, persons living in correctional institutions, and persons living in nursing homes and other care facilities. College students are considered residents of the place where they live while attending school. Seasonal populations, such as vacationers or migrant farm workers, are considered residents of the place they consider their usual residence. Persons with no usual residence are counted where they are on April 1.*

The estimates are developed as accurately as possible from standard and tested methods. The specific procedures used to develop estimates depend on the availability of state and local area data. *State estimates* are developed by a component method. Population age 64 and under is based on vital events and an estimate of net migration based on school-age migration and wage and salary employment change. *County populations* are developed by three methods: the component method, ratio correlation, and the housing unit method. Ratio correlation relates change in the county's share of the state population over the last decade to changes in the county's share of a set of symptomatic data over the same period. The current equation contains school enrollment, voter registrations, auto registrations, housing, births, and deaths to persons age 65 or over. Changes in the symptomatic data are then tracked annually over the next decade to estimate population. The housing unit method estimates population on the basis of housing change and assumptions about occupancy rates and average household size.

City populations include both estimates and actual counts. About 10 cities count their population each year. The housing unit method is used to prepare estimates for the remaining cities. Cities report the changes in their housing each year and the count of persons residing in group quarters facilities, such as nursing homes and correctional facilities, and annexations. The reliability of the housing unit estimation method depends on accurately determining all of the factors required in the calculations: the current housing stock, the occupancy rate, and average household size.

Methods and procedures may be abbreviated during the early part of each decade. Often required data details are not yet available from the new decennial census.

Special Thanks

OFM would like to thank the following agencies for their continued help and cooperation in the annual publication of Population Trends:

- Center for Health Statistics, Epidemiology, Health Statistics and Public Health Laboratories Division, Department of Health, for supplying vital statistics data;
- Office of Research and Data Analysis, Department of Social and Health Services, for providing selected institutional population counts;
- Department of Veterans Affairs, for furnishing veteran institutional counts;
- Housing directors of the colleges and universities, for submitting April 1 dormitory counts;
- Armed forces personnel at major bases in the state, for contributing data on current resident military counts; and,
- All of the city staff, and county and regional planners for providing data used in the development of the April 1 population estimates.

Unincorporated	2,374,593 \$	2,407,904 \$	2,423,073 \$	2,361,802 \$	2,395,226
Incorporated	3,519,550 \$	3,567,006 \$	3,618,637 \$	3,736,498 \$	3,772,574

The county and municipal populations shown for 2000 are, with a few exceptions, the 2000 federal census Public Law 94-171 counts. Federal census counts have been adjusted for annexations from January 1 to April 1 in 2000. Also, some city special census counts are used rather than the federal census counts. See Table 5 following this page for further information.

Liberty Lake, Spokane County, incorporated on August 31, 2001. Spokane Valley, Spokane County, incorporated on March 31, 2003.

* State Certified Special Census: A population and housing count that meets all special census certification requirements.

Informal Census: A population and housing count that is considered accurate but does not meet all special census certification requirements.

+ Informal Count: A population count that is considered accurate but does not meet all special census certification requirements.

\$ Corrected federal Census 2000 count and/or a revised state estimate based on a corrected federal Census 2000 count. See Table 5 for details.

@ Incorporation Base: First Office of Financial Management April 1 estimate after incorporation.

Table 5
Notes on Census Corrections and the Differences between the 2000 Federal Census Public Law 94-171 Counts and the Official 2000 Population Estimates by the Office of Financial Management

The Office of Financial Management (OFM) is responsible for April 1 population determinations that are used for state revenue allocations to local governments and in selected state programs requiring population as a criterion for funding and/or administration. Population counts used by OFM in 2000 may differ from the 2000 federal census counts. Differences are noted below:

I. Corrections to the 2000 Federal Counts Due to Misallocation of Housing Units and/or Group Quarters

Revised federal census numbers are cumulative for areas that have more than one correction (Lakewood, Woodinville, King County).

Sources of change in population and housing counts are labeled as follows:

(A): Population and housing units added to the cities due to annexations through April 1, 2000;

(B): Special city April 1, 2000 censuses used in place of the federal censuses; and,

(F): Census Bureau's corrections to the federal counts due to misallocation of population and housing units. State totals may change if there are federal corrections to county population and housing units.

Abbreviations: HH – Household

Occ. – Occupied

Vac. – Vacant

GQ – Group Quarters

STATE, COUNTY, CITY POPULATIONS

Table 6

Rank of Cities and Towns by April 1, 2004 Population Size

With a few exceptions, year 2000 data are federal census P.L. 174 data. See Table 5.

Notes:

Liberty Lake, Spokane County, incorporated in August 2001.

Spokane Valley, Spokane County, incorporated in March 2003.

* State Certified Special Census: A population and housing count that meets all special census certification requirements.

Informal Census: A population and housing count that is considered accurate but does not meet all special census certification requirements.

+ Informal Count: A population count that is considered accurate but does not meet all special census certification requirements.

\$ Corrected federal Census 2000 count and/or a revised state estimate based on a corrected federal Census 2000 count.

@ Incorporation Base: First Office of Financial Management April 1 estimate after incorporation.

Table 8

Housing Units by Structure Type for Cities, Towns, and Counties**April 1, 2000 and April 1, 2004**

Housing unit estimates are revised on an annual basis to include the most current data available. City housing units by structure type as reported in SF3 have been adjusted to match city housing totals as reported in SF1. Census 2000 housing by structure type from SF3 (sample count) is available on the OFM web site.

STATE, COUNTY, CITY POPULATIONS

Table 8 *continued***Housing Units by Structure Type for Cities, Towns, and Counties****April 1, 2000 and April 1, 2004**

Housing unit estimates are revised on an annual basis to include the most current data available. City housing units by structure type as reported in SF3 have been adjusted to match city housing totals as reported in SF1. Census 2000 housing by structure type from SF3 (sample count) is available on the OFM web site.

\$ - Corrected federal Census 2000 housing count based on a corrected federal Census 2000 count. See Table 5 for details.

* - Fifteen to 20 percent of the mobile homes and house trailers in Washington are usually classified as single family houses in the decennial census. A negative figure in the mobile home/trailer category indicates a city has lost more mobile homes/trailers than were counted in the 2000 census. When using the housing data, the negative numbers should be subtracted from single family housing.

Note: Housing unit estimates are revised on an annual basis to include the most current data available.

Liberty Lake, Spokane County, incorporated on August 31, 2001. Spokane Valley, Spokane County, incorporated on March 31, 2003.

Note:

Annexed areas of less than 0.0005 square miles are shown as 0.000 square miles.

All boundary changes are due to annexation unless otherwise noted below:

Negative area annexed means the city/town either de-annexed area or had a boundary adjustment with either the county or an adjoining city or town.

New incorporations on or after January 1, 2000:

Liberty Lake (2001)
Spokane Valley (2003).

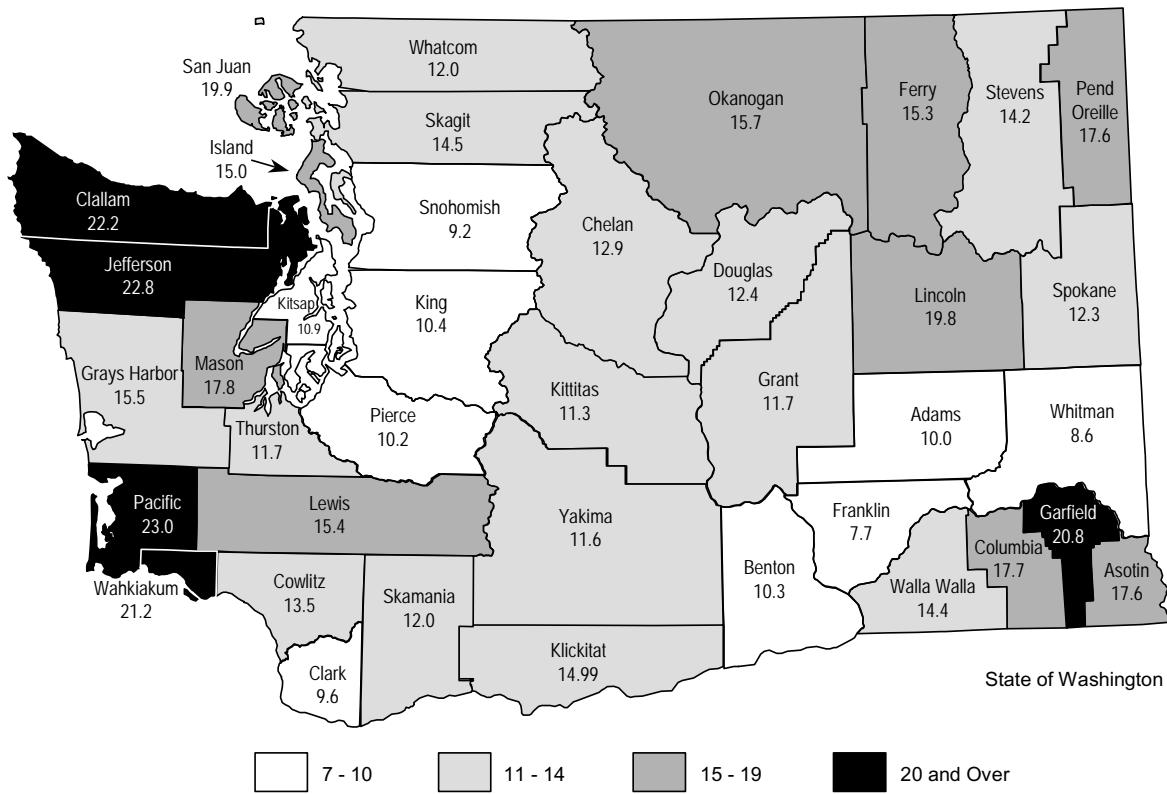

PART II

Selected Estimates, Reports, and Other Information

SELECTED ESTIMATES AND OTHER DATA used in developing population estimates are presented in this section. These include estimates of the elderly population, institutional population, and armed forces personnel. The race and Hispanic estimates usually presented in this section will be resumed as an Internet file in late fall 2004. Other useful information is also provided.

Persons 65 years and over increased by nearly 91,000 between 1990 and 2000 and by over 34,674 since 2000. Current estimates, based on Medicare data, show that Washington's elderly increased from 571,403 in 1990 to 696,822 by 2004, a gain of 21.9 percent since 1990. Increases are expected to continue with the most rapid gains occurring after the turn of the century when the leading edge of the baby boom turns age 65. By 2004, persons age 65 or over represent nearly one-fifth or more of the population in seven counties: Pacific (23.0 percent), Jefferson (22.8 percent), Clallam (22.2 percent), Wahkiakum (21.2 percent), Garfield (20.8 percent), San Juan (19.9 percent), and Lincoln (19.8 percent).

Figure 3. Percent of 2004 County Population Age 65 and Over

Office of Financial Management

August 2004

In fact, Washington's growing elderly population is having a noticeable impact on the population growth in several counties. Natural increase—the excess of births over deaths—is an important component of population change. Natural increase generally accounts for at least half of the state's annual growth, although this level may vary depending on the economy and amount of population gain from migration.

The table below shows the natural increase or natural decrease for all counties that had a natural decline in 2004. A comparison to 1990 shows an increasing number of counties falling into the natural decline category and how the magnitude of the loss is also growing.

**Counties Showing a Natural Decrease—Excess of Deaths over Births
1990 and 2004**

County	1990	2004
Clallam	123	-279
Columbia	-7	-2
Garfield	-9	-5
Jefferson	-18	-95
Lincoln	3	-18
Pacific	-46	-141
Pend Oreille	57	-5
San Juan	29	-34
Wahkiakum	-1	-39

In 1990, five counties in Washington had a natural population decline. By 2004, this number nearly doubled. Most of the Eastern Washington counties with a large proportion of elderly and a historically flat economy, such as Columbia and Garfield, show small and consistent population losses over time due to natural decrease. Other counties, however, are recreational retirement counties that are attracting increasing numbers of elderly persons. These counties, such as Clallam and Jefferson, had natural increase in 1990, or at least minimal declines, but now have more considerable losses. As the population continues to age, and more retirement-age persons move to the state's recreational areas—natural decline in these locations is expected to increase. Unless these losses are offset by younger population migration gains, growth will markedly slow.

- **State and federal institutional populations in Washington increased from 17,773 in 2000 to 19,520 by 2004.** Correctional facilities accounted for most of the increase. Institutional and correctional facility populations are often a major source of population change for cities, towns, and counties and are tracked annually. The new correctional facility built in Grays Harbor County after the Census 2000 count now has 1,951 inmates. Other group quarters populations that are a source of local population change include persons living in nursing homes, college dormitories, military barracks, or military personnel living on ships.
- **April to April births in Washington, which had been holding at about 80,000 per year, dropped to 79,291 in for 2001-2002 and to 78,911 for 2002-2003.** Births by calendar year show a more marked decline, from 81,000 in 2000 to 79,003 in 2002—a loss of nearly 2000 births. The actual reasons behind the current decline are uncertain. The birth rates for younger women have continued to decline, but the more recent decline in births generally shows across all of the birth rate cohorts. No marked changes were made to the birth forecasts. Births are now expected to rise to about 89,000 per year by 2010, and to 95,000 per year by 2015—as the women of child bearing age increase.
- **Washington has regained most of the 6,000 resident armed forces decline that occurred over the 1990s.** Armed forces personnel have increased from 47,910 in 2000 to 52,930 in 2004.

SELECTED ESTIMATES, REPORTS, AND OTHER INFORMATION

Military personnel in Pierce County, primarily at Fort Lewis, dropped from 24,128 in 1990 to only 16,847 in 2000. Current armed forces in Pierce County are estimated at 20,183—a gain of 3,336 over the 2000 count. Estimates are variable for Ft. Lewis due changes in the level of military personnel and to overseas assignments.

The resident armed forces estimates for Kitsap and Snohomish Counties have been revised from 2000 forward due to the clarification of U. S. Census Bureau count rules for shipboard personnel. From 2000 forward, all military personnel residing aboard ships, even if deployed overseas, are counted at the ship's assigned homeport. This provides a much more stable armed forces estimates for Washington counties with Naval vessels. Kitsap county resident armed forces personnel was 10,624 in 2000 and 11,612 in 2004—with little variation in between.

When Naval Station Everett and the Smokey Point support facility were completed, the armed forces count for Snohomish County increased from 751 in 1990 to 4,662 in 2000. Resident armed forces have declined to about 4,100 in 2004 due the decommissioning of the USS Fife and the USS Paul M. Foster.

Note: Actual Medicare data through 2002.

Annual change is extremely variable for some counties due to changes in the Medicare data which may not be valid. Caution should be used when interpreting the variable data.

Estimates were smoothed for Adams, Chelan, and Whitman Counties.

Detail may not add due to rounding. Unrounded numbers are not meant to imply precision.

Notes: Inmates in pre-release facilities in Pierce county and Spokane County were added to this series in 2000 through 2004. Thus, these data are not strictly comparable to the 1990s series.

Includes persons in state and federal mental and penal institutions, veterans' homes, and schools for the deaf, blind, and mentally challenged. Excludes persons in adult work release facilities, diagnostic centers, and group homes.

Notes: Intercensal estimates from 1991 through 1999; postcensal estimates for 2001 through 2004.

Military installation report data sometimes adjusted to smooth reporting variations.

Armed forces personnel are included in the population estimates and are persons on active duty with the United States Army, Navy, Air Force, Marine Corps, and Coast Guard. Armed forces personnel include personnel residing on and off base as well as those in group quarters living arrangements such as barracks or on ships.

Estimates prior to 2000 exclude military personnel on ships deployed to the 6th or 7th Fleet. From 2000 forward the crews on ships deployed overseas are counted at the vessel's homeport in the U. S. This makes the armed forces estimates for counties with Naval Stations much more stable. Unrounded estimates are not meant to imply precision.

Note: Average lifetime births per woman are based on age specific fertility rates for the year indicated. Actual vital events through December 2002 used in computations. Vital events are for April 1 through March 31, except for 1930, 1940, and 1950. Vital events for 1930, 1940, and 1950 are calendar year. Unrounded population estimates are not meant to imply precision.

SELECTED ESTIMATES, REPORTS, AND OTHER INFORMATION

Table 15

Median Household Income Estimates by County: 1989 to 2004

In current dollars; series revised 1990 forward. The estimation relies on both 1990 and 2000 census data. These estimates are based on past relationships between available indicator data and median household income. The estimates shown may differ from other median household income data developed from the Office of Financial Management's State Population Survey, Census Bureau estimates, or other sources. Survey data, which are subject to sampling variability and errors, are not necessarily more correct than the estimate data.

Note: 1989 and 1999 median income numbers are derived from the 1990 and 2000 U.S. Census of Population and Housing, respectively. Complete intercensal series is on the internet.

*Estimates of median household money income for 1990 through 1998, and 2000 through 2002, are based on 1989 and 1999 federal census money income data and 1989 through 2002 Bureau of Economic Analysis (BEA) county level personal income data. *Preliminary estimates for 2003 are based on the 2003-03 payroll data compiled by the state Employment Security Department and the state total personal income data published by BEA. **Projection for the year 2004 is based mainly on the Forecast Council's September 2004 forecast of total state personal income.*

Money income, as defined by the Bureau of the Census, includes wage or salary income; self-employment income; interest, dividend, or rental income; social security or public assistance income; retirement or disability income; etc. It excludes some of the income components of personal income defined by the BEA. For example, employer-paid pension and medical benefits are included in personal income but not in money income. The median measures the point at which half of all households have more income and half have less.

Washington State Data Center and Business and Industry Data Center

The Washington State Data Center (SDC) and Business and Industry Data Center (BIDC) represent federal-state cooperative programs sponsored by the U. S. Department of Commerce, Bureau of the Census. The Office of Financial Management (OFM) is the state agency responsible for administering these programs in Washington State.

A list of the Washington SDC/BIDC coordinating agencies and affiliate members is provided on the following pages. These organizations and contact persons play an important role in the release of 2000 census information. All members have a wide range of Bureau of the Census 2000 census data releases and summary data releases developed and distributed by OFM. Many of the larger participating universities, regional councils of governments, and county planning agencies have developed publications suited to supply the data most requested by local constituents. Several organizations provide specialized computer processing to meet individual data needs.

State Data Center/Business and Industry Data Center Organizations and Contacts
